

Helping older people live
independently at home
for longer

The Unmet Needs

Social care packages mis-sized
due to lack objective evidence
when doing assessments

Local Authorities struggling to
fund care home admissions

Private & third sector care
providers handing back contracts
due to financial pressures

NHS dealing with
increasing A&E visits
and bed-blocking

The whole system is propped up
by 13.6m unpaid carers who are
in desperate need of support

Smart, remote activity monitoring

Movement

Door activity

Temperature

Light

activity
monitoring

How Canary Care Meets The Needs

Provides objective evidence to support care package assessments and rightsizing

Enables Local Authorities to support independent living and prevent/delay care home admissions

Enables care providers to deliver services more efficiently

Helps the NHS to prevent admissions and support hospital discharge and reablement

Provides reassurance and support to unpaid carers allowing their loved ones to remain at home

Northamptonshire County Council & Olympus Care Services

“ Canary has made a real difference. Everyone wants to stay longer in their own homes, but Canary makes that possible for an increasing number of people in the region. ”

Pedro Santos, Team Leader
Olympus Care Services

OCS currently has over **150 units** in operation, with additional installations each month. NCC estimates overall **savings of £821,691** this financial year from Canary Care.

Average *annual saving* per customer: **£7,453**

Average return per Canary Care system in year one: **~1500%**

Using Canary Care since 2017 with their Older People and Mental Health Services.

Occupational Therapists found that Dementia patients were unable to accurately describe how they were coping around the home, on occasions.

Canary Care allowed SABP to passively monitor Activities of Daily Living (ADL) and individualise care plans for their service users.

Canary brings:

Benefits to the Professionals

Benefits to family members

Benefits to the Service Users

Keeping the patient safe and everyone informed.

Amica24 and Canary Care

How technology enabled care (TEC) is transforming people's lives

TEC delivers positive outcomes to individuals with unique circumstances

" he absolutely could not remain at home without it. It has been life changing "

Canary Care have been collaborating with Amica24 during COVID and as a result Amica24 have just launched their first monitored Canary Care service.

Why Canary Care?

Proven. We have been delivering a **reliable service to paying customers** for over six years.

Flexible. Our solution addresses multiple channels and supports many short and long-term use cases.

Simple. Designed for consumers. Easy self-installation, intuitive apps.

Unique. Our multi-function sensor was specifically designed for care applications.

Control. We own all the IP for our end-to-end service. We design and manufacture our own hardware giving us more supply chain security.

Any questions?

Helping elderly and vulnerable
people live independently at
home for longer
