SmartLife

Ground-breaking interoperability for a new digital era of Technology Enabled Care (TEC)

Enabling you to maximise existing investments in TEC through interoperability

- SmartLife, the UK's first digital dispersed alarm with interoperability, is the latest addition to our SmartTEC range. Providing housing and care providers with the reassurance of compatibility with the UK's digital telecoms network.
- Provides you with greater choice and enables you to personalise services through interoperability with other manufacturer telecare devices.
- A future-proofed digital solution, with unprecedented connectivity that provides you with the confidence you are making a long term investment.
- Integrated I'm OK feature with physical backlit button on the unit.

True intereoperability is often cited as offering significant benefits to commissioners, service providers and users of TEC services.

Steve Sadler, TSA Associate, Technology Strategy

SmartLife

Ground-breaking intereoperability

- Digital 4G (SCAIP or NOWIp & GSM)
- Compatible with Tunstall, Cair and Appello peripherals (Tynetec hopefully in 22)
- Bluetooth and Wi-Fi capabilities (Bluetooth speaker in bedroom or Bluetooth hearing aid)
- Industry standard DMP uses TR069 giving over the Air (OTA) updates and programming capabilities linking in to Appello Cloud Services
- Calls over VOIP (Not Voice over LTE) does not generate call charges from Monitoring centre
- Low cost true roaming SIM of £3.50 per month from CSL
- Fully compliant with all standards (UK and European)
- Appello SmartLife use's Transport Layer Security (TLS 1.2) offering end to end encryption.
- TLS 1.2 Encryption giving end to end protection of Data
- 3 second connection time

This means when you can start to replace your dispersed alarm units you can re-use your existing Tunstall radio

SmartLife
Digital Dispersed Alarm
