Vayyar Care

FEELING
SAFE IS
MY RIGHT

The Health & Social Care Sector has been hit hard by COVID-19

- i Elevated risk of infection
- i Rising costs
- i Impact of isolation

Providers want to bounce back fitter and stronger.

32%

Rank **improving fall detection**
in their top three challenges

33%

Rank **enhancing person-centered care**
in their top three challenges

Rank recruitment and retention
in their top three challenges

How can we do more with less?

What data do providers need to deliver person-centred care?

Issues ranked as top 3 priority

The 3 Dimensions of Fall Prevention.

Fall detection

Identifying minor, unreported falls prevents serious incidents down the line.

Fall prediction

Activity data reveals fall risk factors such as reduced mobility and poor sleep quality

Fall intervention

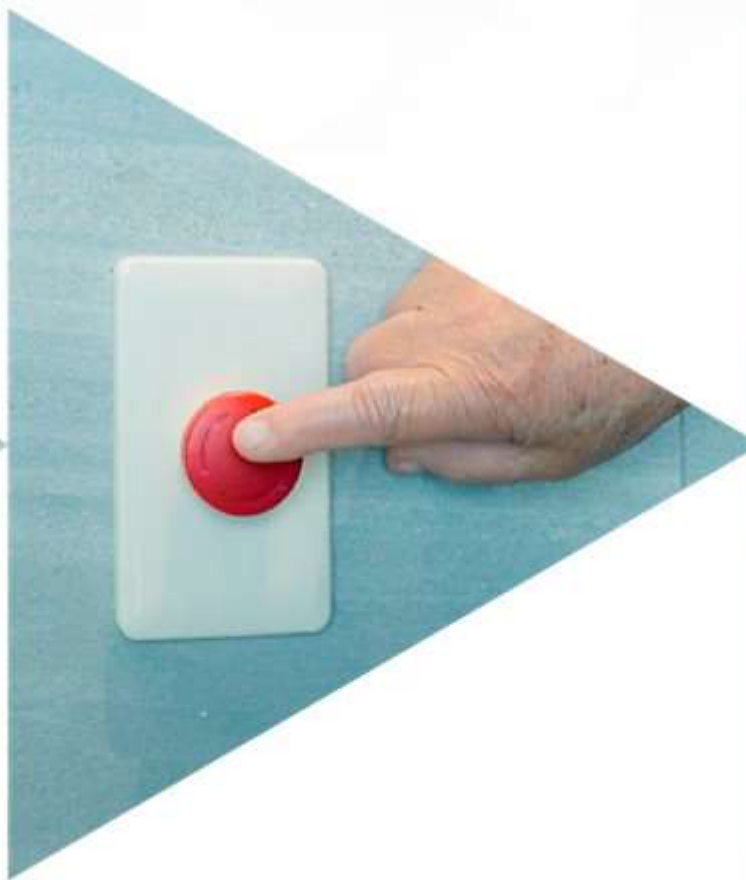

Alerts when residents sit up in bed enable caregivers to step in

Standard solutions are just not good enough

Bathrooms are off-limits for cameras

If people can't push the button or pull the cord, help won't arrive.

50% of older adults refuse or forget to put on wearables

JOIN THE

GREYT REVOLUTION™

The future is touchless.

No cameras

No buttons/cords

No wearables

Real-time updates and insights

Vayyar Care uses low-power radio frequency waves to generate 4D point cloud imaging.

It provides constant monitoring and automatic event notifications - no resident action required.

- ▶ Instant fall detection
- ▶ Dynamic presence tracking – time at rest & bathroom visits
- ▶ Imminent bed exit alerts for fall intervention (coming in 2022)
