Konnnect vs. traditional technology (e.g. smartphones / iPads)

In terms of Usability	<i>Konnnect</i>	Tablet / smartphone
Largest, brightest, most familiar screen in the home?	YES	NO
User doesn't need to download an app?	YES	NO
User can instantly access (no sign-on)?	YES	NO
Works without needing to be charged?	YES	NO
Provides a complete view of the user and the user's environment?	YES	NO
No need to hold / balance the device?	YES	NO

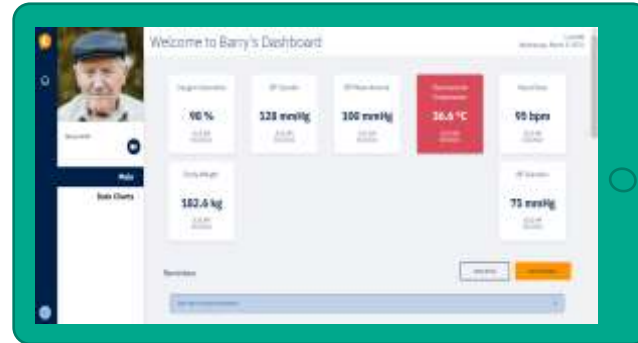

Konnect Health

Health readings collected with ease, enabling smart remote monitoring

- Interoperable with health & care systems
- No manual entry of readings required. Readings are automatically transmitted to and recorded on the Konnect Dashboard
- Konnect Dashboard encrypts all readings
- Thresholds can be assigned to any or all devices, which then automatically highlight readings outside the patient's normal range i.e. anomalies
- New devices can be integrated on request

BLOOD SUGAR
