

### Who are we?

- Founded in 2004 in Finland.
- Providers of digital solutions since 2007.
- European market leader in digital grouped living solutions.
- Offices in Finland, Sweden and the UK.
- 10% of our revenue is invested back into R&D.
- Service 80,000+ clients per annum.
- We offer a person centred digital 'plug and play' wireless solution.

### Vision.

Our Vision is to provide a trusted digital solution that allows the individual to live a safe and independent life.

At the heart of what we do is any vulnerable individual with specific support requirements.

# Protocols & Security.

### Protocols.

- Digital. TS50134-9 | SCAIP BS8521-2 | NOWIP

- Analogue. BS8521-1 (Bridge).

### Security.

TLS v1.2 – Upgrading to v3 VPN.

Data encryption 'in transit' and 'at rest'.

### Resilience.

- Dual SIM.
- Both roaming.
- Both non-steered.
- Separate SIM providers.
- 2 Core infrastructure.
- WiFi.
- Ethernet.

# Today's Model.

- Reactive.
- Alerts are post incident.
- Individual is already unwell / hurt / distressed.
- No reduction of primary / secondary care incidents.
- Reliance on legacy technology.
- Reluctance towards true interoperability.

# Proactive Model.

- Alerts received based on a particular situation / data set.
- Interventions are made prior to individual distress, accident or illness.
- Primary and secondary care incidents are reduced.
- Legacy equipment replaced with efficient and safe digital technology.
- Providers working together to solve commissioners' outcomes.

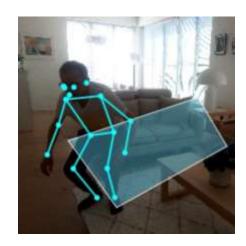

### What are commissioners' expectations?

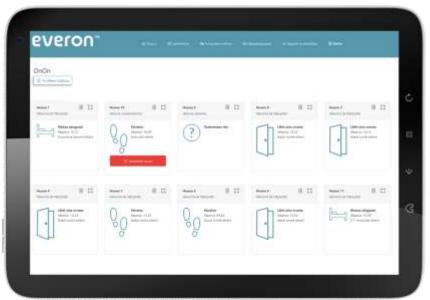

- Fall prevention.
- Facial recognition / expression, grimaces, pain indication.
- GAIT walking patterns for indications of stability.
- Blood oxygen / sugar levels.
- Fluid intake.
- Cardiac health.
- Air quality / humidity / mold.
- Is this possible Yes!!

#### OnOn Smart Sensor.

- Digital monitoring 24/7 whilst maintaining privacy.
- Discreet smart sensor located in the individuals set room.
- Lifestyle monitoring.
- Artificial Intelligence & Machine Learning.
- Real time analysis of movement, behavior, raises alerts.
- Fall monitoring, hard and soft.
