

## Key safes:

More than just a little  
metal box

Nikki Leadbeater

# Build on strong UK foundations

**2,200,000+**  
key safes sold

**1,000,000**  
C500 sold since launch

**10,000**  
businesses serviced

**20**  
countries patent  
protection

**12 / 51**  
trademarks / patents

CarbonNeutral.com

Assessed to ISO9001. Ref. No. 1004

# Access and TEC

Lots of versions of this image showing the various pieces of telecare equipment

In a survey – 36% of older people put falling over as their top concern

The TEC may send the alert, but how does the responder gain access in order to help

# So many key safes

What should you consider when choosing a key safe?

- Temporary or permanent
- Capacity – what does it need to hold?
- Security – internal or external?
- Who will be using the key safe?

# A temporary solution

Often used for hospital discharge if there is not enough time to fit a permanent key safe

Alternatively, used for void property turnaround

2 types available

- Portable key safe
- J5 key safe (different brackets available)

Idea being that once a permanent key safe is fitted, the temporary key safe can be returned to the discharge team to be used again

# Classic key safes

Often used internally, for example sheltered housing complexes where security is not a requirement

Products are discreet, cost effective and reliable

2 types available

- Slimline key safe
- Permanent key safe

Capacity for 2-3 keys

# Our most secure key safes - the Police Preferred Range

Supra C500 Pro KeySafe™

Supra P500 Pro KeySafe™

ark Tamo™

Secured by Design Police Preferred status  
Independently attack tested and rated by the

# KiCall

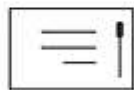

Critical information at the point of need

KiCall uses QR code technology to make information accessible where and when it's needed, without you having to be there. Infinitely scalable, **KiCall** can be deployed to deliver critical information at multiple locations, around the clock.

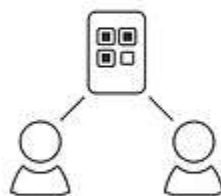

Digitally tailor, manage and share important information with the intended recipients, exactly where and when it's needed.

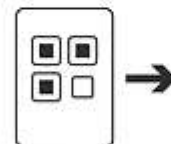

1. Register KiCall

2. Create your message

3. Share with users

4. Place where you need it

5. Relax, you're done!

# We're here to help

## What help/support can we provide to you?

- Advice and support for access solutions
- Dedicated client support manager
- Training for installers and assessors
- Good practice guide available to help set your policies
- Literature available
- Online resources: blogs, FAQs, product information
- See our website: [www.keysafe.co.uk](http://www.keysafe.co.uk)
