

# INTRODUCING GBR DIGITAL HEALTH SOLUTIONS

## WHO ARE GBR DIGITAL HEALTH SOLUTIONS ?

At GBR Digital Health Solutions, we are dedicated to driving the digital transformation within the TEC industry that must occur by 2025. With over 30 years of combined experience in technology-enabled care, the founders of our company have a wealth of knowledge and expertise within this niche area. Our team possess a unique blend of expertise, including installation experience, understanding of end-user needs, contact centre proficiency, and experience working with organisations like 999 and Urgent Care. This enables us to offer a level of service throughout the UK that is truly unparalleled. We believe in the power of technology to revolutionize the way we deliver TEC and we are committed to making a meaningful impact in the digital era.

## ANALOGUE TO DIGITAL SWITCH OVER

The analogue to digital switchover in telecare replaces outdated analogue systems with advanced digital devices. This transition brings improved reliability, enhanced functionality, better connectivity, and data-driven care. It enables seamless integration with other healthcare systems and facilitates personalised care plans. While careful planning and execution are required, the long-term benefits make it a worthwhile endeavour for the telecare industry. The deadline for the digital switchover is December 2025.

Housing and care providers believe their plans for moving to digital TEC is on or ahead of schedule.<sup>1</sup>
