

# UK Telehealthcare Technologies to Ease Winter Pressures

## GBR HomeSight: Reducing Winter Pressures

# Winter Pressures

## UK Winter Pressures

- Rising demand across NHS, social care & urgent care
- More ambulance callouts, A&E overcrowding, admissions
- Discharge delays and reduced system capacity
- People deteriorating at home unnoticed until crisis point

## How HomeSight Helps

- Tracks daily routine changes through the Hub/TV
- Flags early warning signs before escalation
- Enables earlier check-ins and proactive intervention
- Supports virtual wards + safer discharge monitoring
- Helps reduce avoidable admissions and pressure on frontline teams

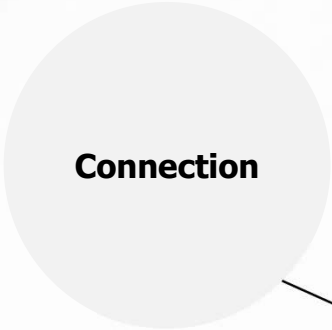

# What is the GBR HomeSight?

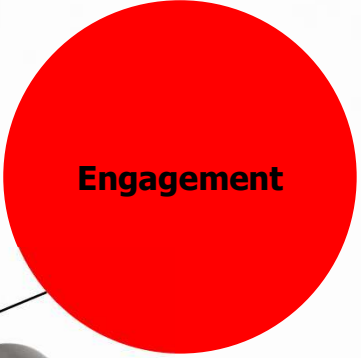

HomeSight is a discreet in-home monitoring device that operates through user's televisions to track changes in daily routine and wellbeing, helping services spot risks early and intervene before a crisis happens.

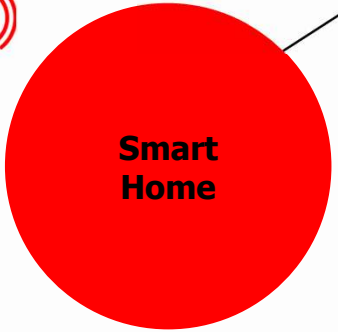

# GBR HomeSight Features

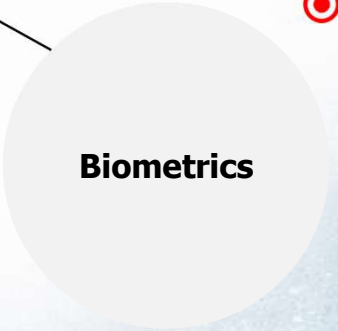

Video calls  
Auto answer (hands-free)  
Messages on TV  
Photo & Video sharing

Easy to use app, Family and Connection! More services & content being planned

Sensors (Environment & motion)  
ADL, Door sensor, PIR, smart plugs, temperature sensor and More sensor integrations being planned

Blood pressure  
Body weight  
Body temperature  
Pulse Ox  
Glucose monitoring

# Preventing Hospital Admissions

HomeSight helps identify early warning signs that someone may be deteriorating at home, including:

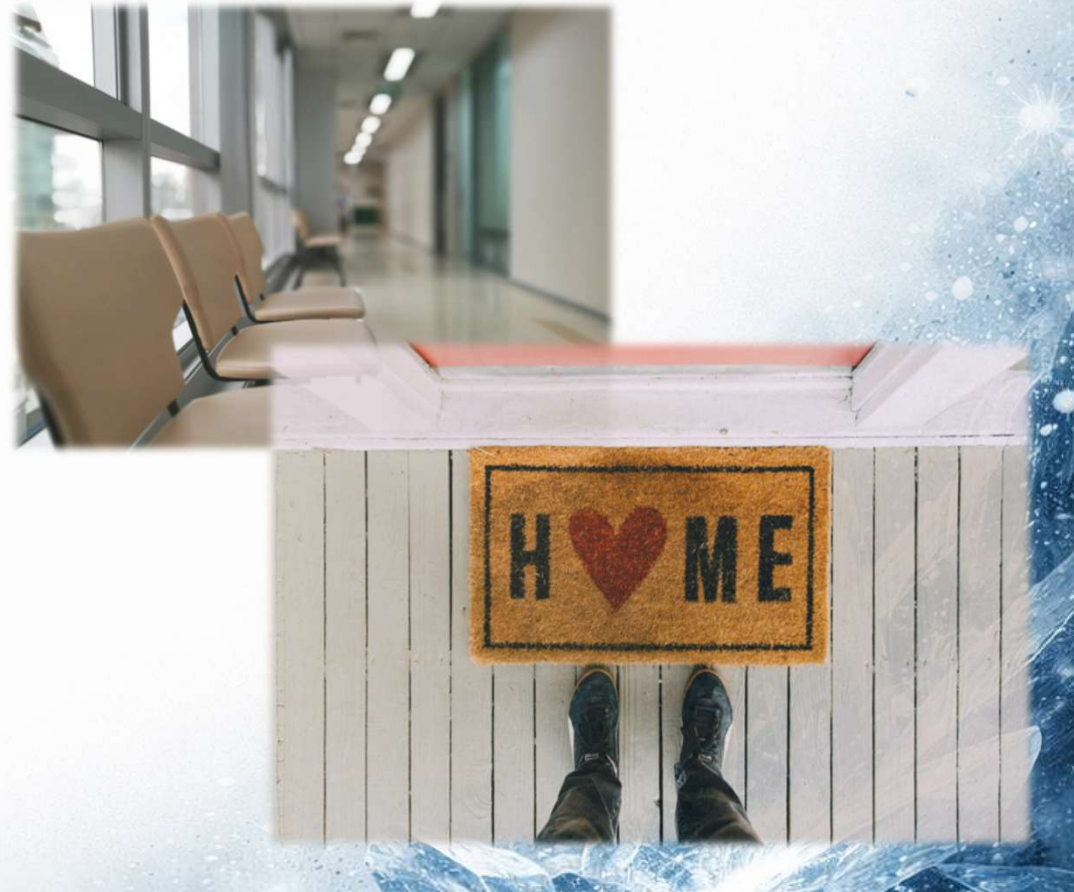

- Reduced movement / activity
- Staying in bed longer
- Lack of appliance usage
- Drops in temperature
- Missed daily routines, missed medication/appointments etc

This enables early check-ins and proactive intervention before issues escalate.

Through the HomeSight we achieve fewer emergencies and avoidable hospital admissions

# Virtual Wards & Proactive Care

- Enables continuous monitoring and proactive intervention, supporting safe discharge and preventing re-admissions.
- Provides a digital infrastructure for clinicians to manage patients remotely with real-time visibility.
- HomeSight securely sends data to our dashboard for remote review.
- Enables video consultations, alerts and direct engagement between patients and clinical teams.
- Enable clinicians to remotely prescribe and send rehabilitation videos to HomeSight, allowing users to complete guided exercises safely at home.

# Outcomes and Benefits

## Reducing Visits by 1/Day Per Client – Potential Annual Savings

Savings per Client	
 Per Day	<b>£30</b>
 Per Week	<b>£210</b>
 Per Month (30 days)	<b>£900</b>
 Per Year	<b>£10,950</b>

 Saving for 100 Clients:

**£1,095,000**  
Saved Per Year

**£1,095,000** ready to be re-invested into the Care sector

\* Based on £30 per avoided visit

# Thank you!
