New launch coming up: Amy, the Advanced GPS Alarm Watch

Amy GPS alarm watch is a personal alarm featuring positioning and voice capabilities.

Its compact and comfortable design ensures it is easy to carry wherever you go.

It is reliable and safe, with a long battery life and features self-activated and automatically triggered alarms, including fall detection.

Amy has the option to connect to a monitoring centre using SCAIP/TS 50134-9.

Alternative watch faces

Amy in detail

Dedicated alarm button

One single alarm button with the option to set suitable delay to prevent false alerts.

Excellent voice quality

Support VoLTE and wide band audio. Adjustable speaker and microphone levels.

Multiple position systems

Built-in beacon system ensures precise positioning at home. Satellite (GPS), WIFI and LBS position when outside the home.

Geofence

Option to configure geofence alarm for both exit and entry of dedicated zones.

Home & Away

Option for alarm or notification when the user enters or exits the home.

Highly adaptable

Functions and interfaces can be remotely adjusted to suit the user's demand.

Heart rate & SpO2 sensors*/**

Option for the user to self-check or remotely check from i-care® online.

Step counter

With daily goal to encourage physical activity.

Messaging service**

Possibility to support reminders or "are you OK" service.

Auto display on

Activate the display when raising the arm.

Voice prompts

Provide alarm confirmation in the local language when an alarm is sent.

Waterproof

To IP68 standards.

Durable design

Robustly designed for long-lasting daily use, with scratch-resistant Gorilla Glass 3 to protect the screen.

No motion alarm**

A longer time of inactivity may indicate a problem.

i-care® plus support

Can be connected to i-care® plus application for family and friends.

Contact button

Send contact request to carers using i-care® plus application. Alternative to SOS alarm when there is no urgency.

4G Connectivity

Support of relevant 4G bands and fall back to 3/2G in case of no 4G coverage.

Installation mode

Enable interface adjustments to take place not only via i-care but also locally.

*For wellness purposes only, not medical purposes

**All functions may not be available at introduction
